- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 20, 2006 has been entered.
- 2. The following is an examiner's statement of reasons for allowance:

In reviewing the REMARKS/ARGUMENTS accompanying applicant's submission or amendment filed on January 20, 2006, regarding applicant's argument that the references fail to show certain features of applicant's invention, it is noted that one of the features upon which applicant relies, i.e., the particulates must be configured to prevent the release of the fluid trapped on the particulate (note last/overlapping paragraph on Page 13) is not recited in the rejected claim(s). Moreover, several of applicant's claims, such as claims 17-20, recite that the coating comprises a "degradable coating material", which would appear to eventually release the trapped fluid. It is well settled that, although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPO2d 1057 (Fed. Cir. 1993).

It is further noted, however, that applicant's argument(s) set forth in Page 14 of their submission, i.e., "the coating and surface of the particulates disclosed in Nguyen ... necessarily does not trap a fluid such than the density of the particulate is reduced" is concurred in. In this regard, neither Nguyen, or other prior art cited of record, considered either singly or in combination, set forth any disclosure or teaching of trapping a fluid on a particulate utilized in a

well treatment operation, such as fracturing, between the surface of such particulate and the coating so that the density of the particulate is thereby reduced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In Claim 41, line 9, the recitation "a gravel pack" has been amended to read
-- gravel pack --, in order to correct an obvious error(i.e., lines 8 and 9 currently read "so that
the a gravel pack").

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 571-272-7036. The examiner can normally be reached on M-F (6:30 - 3:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
